

Slip Sheet Specification Sheet

Description

Slip sheets are an innovative and effective alternative to traditional wooden and plastic pallets.

Composition

100% Recycled Kraftliner
Fully Recyclable

Standard Sizes and Finishes

Our standard slip sheets are made from uncoated kraftliner however we can also supply water-resistant, heat resistant and an anti-slip versions. They can be supplied with different flap sizes and in a variety of thicknesses to suit your weight requirements. Our most common sizes are: 1200 x 800mm and 1200 x 1000mm with 60mm flaps in 0.8mm thickness (800kgs approx. carrying capacity)

Benefits

- Paper slip sheets are much cheaper than wooden or plastic pallets
- Huge space saving - up to 1,000 slip sheets fit in the space of 10 pallets
- Slip sheets weigh 20 times less than wooden pallets, saving shipping weight
- Using slip sheets instead of wooden pallets allows for 12-15% more products in transport containers
- Can be customized to fit any size load
- Recyclable and reusable
- Unlike wooden pallets slip sheets are not subject to phytosanitary restrictions
