

Anti-slip Sheets Specification Sheet

Description

An unbleached test liner, coated on both sides with a special coating to give non-slip properties to the paper, also giving good water hold out. Primarily used as an interleaving sheet for goods stacked on pallets so to assist in the elimination of the movement of goods during shipment.

Composition

100% Recycled test liner paper
Fully Recyclable

Standard Sizes (mm)

1170 x 770
1170 x 970

Non standard sheet sizes can be made to order.
Can also be supplied in rolls

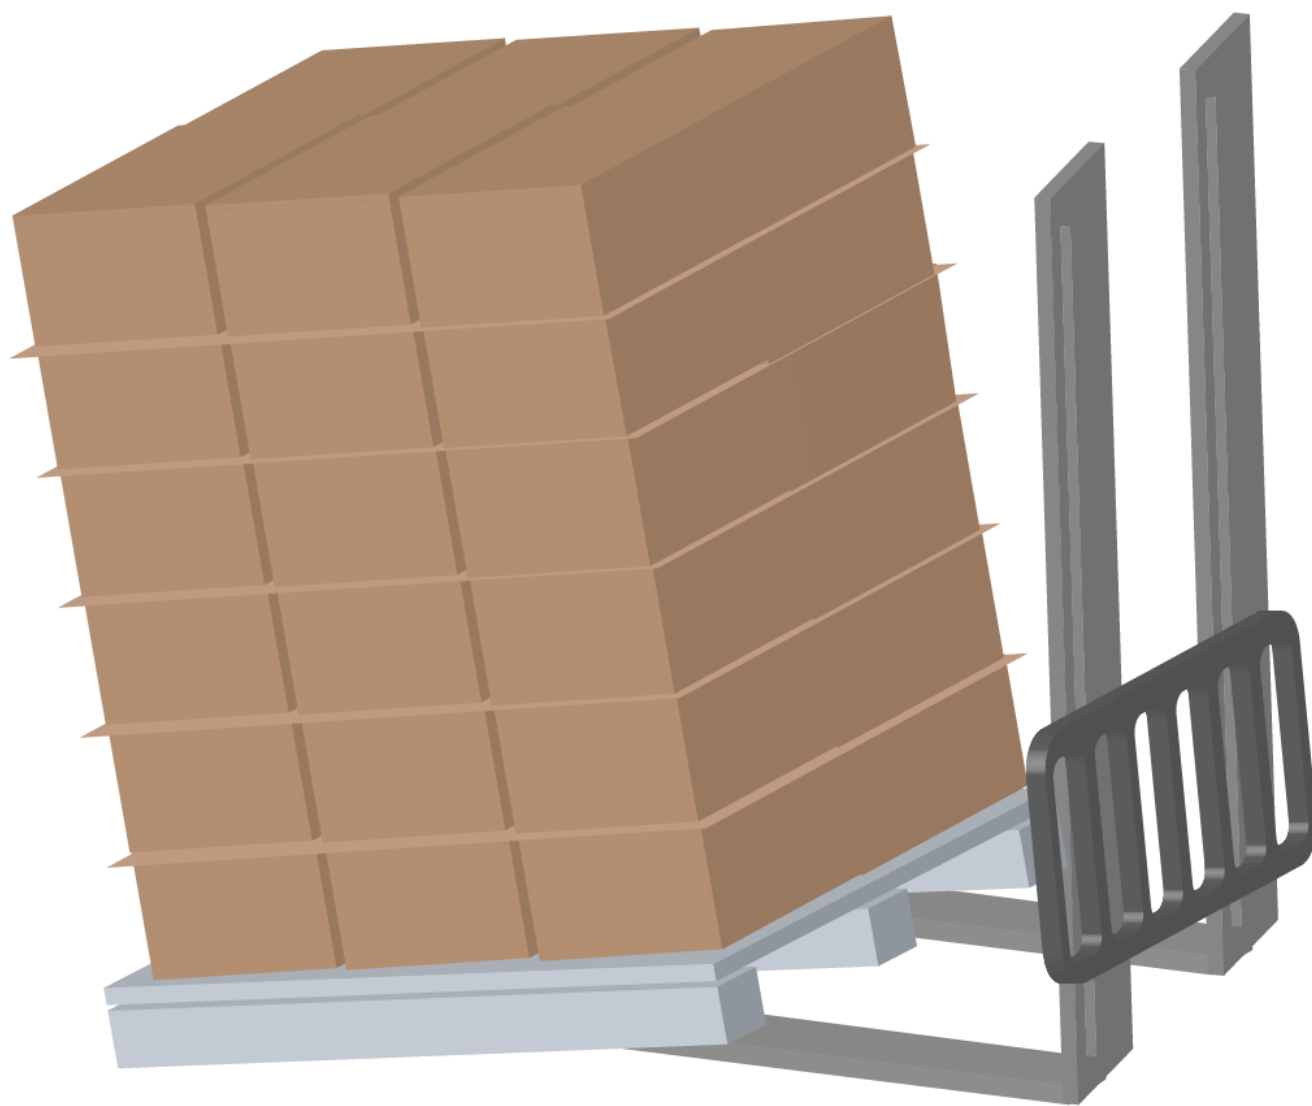

Grade

106gsm (Manual Grade)
166gsm (Machine Grade)

Heavier weight versions can be made to order.

Technical Test Data

Slip Angle: Up to 40 degrees
Resistance to Water Penetration: 8 Hours
